A slack hand causes poverty, but the hand of the diligent makes rich.
– Proverbs 10:4 (ESV)

## SAVE TIME AND MONEY BY TRANSFERRING CREDITS!

### PRIOR LEARNING CREDIT

Save time and money by earning college credit for your life experience! There are two ways of doing so: credit by portfolio and credit by exam. Build a portfolio of your post-high school personal and professional learning experiences. Or take advantage of low-cost CLEP, DSST, and UExcel testing options to test out of electives and many general education requirements.

- **Associate Degree:** up to 45 credits
- **Bachelor’s Degree:** up to 75 credits

### TRANSFER CREDIT FROM ANOTHER COLLEGE

If you started a degree at another regionally or nationally accredited college or university, you may be able to transfer credits toward your CCU degree.

- **Associate Degree:** up to 45 credits
- **Bachelor’s Degree:** up to 90 credits

Accepted transfer credits vary by degree program. Check with your CCU enrollment counselor about transfer credit options for master’s degree programs.

## CLASSES START EVERY 5-7 WEEKS
ASSOCIATE OF SCIENCE IN
BUSINESS ADMINISTRATION

The Associate of Science in Business Administration is a two-year degree program that combines business-related coursework with a faith-based liberal arts education. This degree in Business Administration will provide you with an overview of the functional areas of business that are common to all organizations, including accounting, finance, management, marketing, and computer information systems. Business Administration courses emphasize ethical leadership and strong values founded on a biblical worldview as part of every course.

In this program, you will learn how to use accounting information to support decision-making and how various economic systems impact businesses in a global economy. In your Business Administration classes, you will also study marketing concepts including product, price, promotion, and distribution, and how to use statistical analysis to make more effective decisions.

ASSOCIATE OF SCIENCE IN
LOGISTICS AND SUPPLY CHAIN MANAGEMENT

The Associate of Science in Logistics and Supply Chain Management degree program will provide you with a study of Supply Chain Management and Logistics, the backbone of business around the world. Supply chain management is the study of the processes of physical distribution and supply in domestic and international settings, including purchasing and inbound logistics, handling, warehousing, inventory and financial controls, and transportation. Subjects are integrated with a Christ-centered perspective enabling students to demonstrate excellence in the workplace and in their lives beyond the classroom.

The A.S. in Logistics and Supply Chain Management is designed to give you the foundational courses for careers in manufacturing, retail operations, carrier/transportation services, warehouse operations, and purchasing or transportation management. The 15 credit hours of major coursework, as well as the general education and elective credit hours, may be transferred to the Bachelor of Science in Logistics and Supply Chain Management degree.
BACHELOR OF SCIENCE IN BUSINESS ADMINISTRATION

The Bachelor of Science in Business Administration will enable you to pursue a wide range of careers. Through an integrated curriculum that incorporates business fundamentals with an emphasis on ethical leadership and strong values, this program has made a difference for hundreds of adult students who want to advance their careers through a degree in Business.

Focus areas in this degree include business management, project management, ethics and international considerations, and real-world learning experience. You may also choose from one of two optional emphases: Entrepreneurship or International Business.

As one of the top Business Administration programs online, the Bachelor of Science in Business Administration degree offers an optional emphasis in Entrepreneurship, which has been shown to be a driver of wealth creation in every economy where it occurs. This emphasis focuses on “entrepreneurship as a mission,” whether that is incorporating an entrepreneurial mindset at your current company; starting and running a business; efforts in social, sustainable, and mission entrepreneurship; or achieving growth for sustainability in your entrepreneurial venture.

The Business Administration degree’s optional International Business emphasis provides students with a broad exposure to global issues with a practical, applied perspective. Students will explore logistics, international combinations, diversity, and global entrepreneurship opportunities with an evangelical Christian focus. Students should consider the International Business emphasis if they are interested in pursuing a career in international professions in marketing, human resources, management, communications, trade finance, business development, or missions.

BACHELOR OF SCIENCE IN LOGISTICS AND SUPPLY CHAIN MANAGEMENT

In the Logistics and Supply Chain Management degree program at CCU, you will learn how to recognize, describe, evaluate, and implement the basic theories, concepts, principles, and practices in the field. You will also learn the principles in supply chain design and decision-modeling, contract and pricing negotiations, and international supply chain management. Courses are integrated with a Christ-centered perspective enabling students to demonstrate excellence in the workplace and in their lives beyond the classroom.

The B.S. in Logistics and Supply Chain Management is designed for students who are interested in a career in manufacturing, retail operations, or carrier/transportation services, and roles such as a logistician, supply chain analyst, warehouse operations manager, and purchasing or transportation manager.

MASTER OF BUSINESS ADMINISTRATION

The MBA programs at CCU focus on management and leadership. Within these programs, our mission is to equip future business and nonprofit leaders and managers with a Christian worldview and a broad business administration and technology knowledge base. You will be prepared with the skills and tools required for excellence in leading and growing organizations in the global economy.

CCU’s MBA leadership courses attract skilled professionals from diverse industries, giving you an opportunity to learn from your peers, as well as professors with firsthand industry experience.

CCU offers online MBA programs with four emphases to choose from: Leadership, Advanced Accounting, Healthcare Administration, and Project Management. You will explore the concept of “servant leadership” and consider how to incorporate the eternal wisdom and love of Jesus Christ in the way you lead others in the business environment.
THERE ARE NO SECRETS TO SUCCESS. IT IS THE RESULT OF PREPARATION, HARD WORK, AND LEARNING FROM FAILURE.

– COLIN POWELL
CERTIFICATE IN ENTREPRENEURSHIP

The Certificate in Entrepreneurship will help you develop skills related to “entrepreneurship as a mission.” Our entrepreneur training is a vehicle to share the gospel on the mission field — whether by starting a local franchise, working in a family business, or helping a village become self-sustainable overseas. The Certificate in Entrepreneurship is designed to help you craft an entrepreneurial mindset, which is vital for business start-ups as well as established organizations.

Topics of study in Entrepreneurship courses include Entrepreneurship as a Mission; Starting and Running a Business; Social, Sustainable, and Mission Entrepreneurship; and Entrepreneurial Growth. You will also be required to evaluate opportunities to promote self-employment through creativity and the use of God-given talents.

This is available as a stand-alone program, or you may transfer 12 credits from the certificate to a CCU bachelor's degree in Business Administration with an emphasis in Entrepreneurship. The Certificate in Entrepreneurship can also be used to supplement another CCU bachelor's degree, such as Accounting, Business Administration, and Information Systems Management.

CERTIFICATE IN ETHICS

The Certificate in Ethics offers you a unique combination of classes involving business ethics, philosophy, and biblical principles — helping you integrate your worldview into everyday life and work. You will be challenged in our Ethics courses to explore how your personal values and morals impact the decision-making process.

Topics of study in this program include 21st century business ethics, personal and social ethics, and worldviews. Course content has practical application in work, church, and personal settings.

The Certificate in Ethics is available as a stand-alone program, or you can use it to supplement a bachelor's degree in Accounting, Business Administration, Information Systems Management, Organizational Management in Christian Leadership, Human Resource Management, or Project Management.
The Logistics and Supply Chain Management Certificate from CCU will help you gain a deeper understanding of the processes within supply chain management, including purchasing and inbound logistics, handling, warehouse operations, inventory and financial controls, transportation, and reverse logistics.

Topics of CCU’s online certificate include purchasing, inbound logistics, transportation management, and management of information systems. Students can complete this certificate as a stand-alone program, or may transfer 12 credits from the certificate to a CCU bachelor’s degree in Logistics and Supply Chain Management.
