

**Verification Form for
 Physical Disabilities and Systemic Illness**

Colorado Christian University strives to ensure that qualified students with mobility impairments/disabilities are accommodated and if possible that these accommodations do not jeopardize successful therapeutic interventions. The office does not modify requirements that are essential to the program of instruction or provide accommodations for persons whose impairments do not substantially limit one or more major life function.

Colorado Christian University is required by Section 504 of the Rehabilitation Act and the Americans with Disabilities Act to provide effective services for qualified students with documented disabilities if such accommodations are needed to provide equitable access to the University programs and services. Federal law defines a disability as a physical or mental impairment that substantially limits one or more major life activities. Major life activities are defined as the ability to perform functions such as walking, seeing, hearing, speaking, breathing, learning, working, or taking care of oneself. It is important to note that a mobility impairment condition in and of itself does not necessarily constitute a disability. The degree of impairment must be significant enough to substantially limit one or more major life activities. This form is designed to allow us to achieve these goals.

Students who wish to receive academic adjustments due to physical disabilities and systemic illness need to have this form filled out by a **certified physician**. The physician completing this form must have first hand knowledge of the students' condition, must have experience diagnosing and treating college students and will be an impartial professional who is not related to the student.

Release of Information

I, _____, hereby authorize the exchange and release of the following confidential information to the Life Directions Center and Colorado Christian University for the purpose of determining my eligibility for educational accommodations.

 Date

 Student's Signature

Documentation Guidelines For Physical Disabilities and Systemic Illnesses

(Includes but is not limited to: Mobility Impairments, Multiple Sclerosis, Cerebral Palsy, Chemical Sensitivities, Spinal Cord injuries, Cancer, AIDS, Muscular Dystrophy, Spina Bifida)

Any physical disability and/or systemic illness is considered to be in the medical domain and require the expertise of a physician, including a neurologist, psychiatrist or other medical specialist with experience and expertise in the area for which accommodations are being requested. The diagnostician must be an impartial individual who is not a family member of the student.

The following documentation requirements will assist the service provider in collaborating with each student to determine appropriate accommodations. Documentation serves as a foundation that supports a student's request for appropriate accommodations. Recommended documentation includes all of the following:

1. A clear statement of the medical diagnosis of the physical disability or systemic illness;
2. Documentation for eligibility must reflect the current impact of the physical disability or systemic illness on the student's functioning, (the age of acceptable documentation is dependent upon the disabling condition, the student's request for accommodations, and the current status of the student. Therefore, disabilities that are sporadic or degenerative may require more frequent evaluation);
3. If applicable, a summary of assessment procedures and evaluation instruments used to make the diagnosis, including evaluation results and standardized scores if applicable;
4. A description of presenting symptoms that meet the criteria for diagnosis;
5. Medical information relating to the student's needs must include the impact of medication on the student's ability to meet the demands of the postsecondary environment;
6. A statement of the functional impact of limitation of the disability on learning or other major life activity and the degree to which it impacts the individual in the learning context for which accommodations are being requested.

Further assessment by an appropriate professional may be required if co-existing learning disabilities or other disabling conditions are indicated. The student and the Disability Coordinator will collaborate regarding accommodations with the final decision made by the disability specialist.

History of hospitalization: _____

Implications for Educational Success

Learning abilities specific to the post-secondary environment that are impaired by the disability (e.g. difficulty with concentration, slow processing speed, etc.) _____

Implications for taking exams and other classroom activities caused by the disability or medications. Please describe and explain why:

Suggested Accommodations: Each recommended accommodation should include a detailed explanation of its relevance to the disability that is diagnosed. Evaluator also should indicate the level of impaired functioning at which the individual is currently functioning even with the benefits of treatment.

(Final determination of appropriate accommodations will be determined by our office in accordance with the mandates of the Rehabilitation Act of 1973 and the Americans with Disabilities Act as well as court rulings and Department of Education Office of Civil Rights rulings related to these two laws.)
